

WORK FOR UKRAINIANS

Viafin Process Piping Oy is one of Finland's leading specialists in the installation of industrial pipelines. We have strong expertise in the service and maintenance of pipelines in the process industry and in the piping and equipment installations of liquefied natural gas (LNG) terminals.

Viafin Process Piping Oy is part of the Viafin Service Group.

Viafin Service Oyj listed on the Nasdaq Helsinki First North marketplace in fall 2018 and employs more than 400 people throughout Finland. The Viafin Service Group also includes the subsidiaries Viafin GAS Oy, Viafin Industrial Service Oy and Viafin Installation Oy.

We are looking for foremen and engineers for pipeline projects throughout Finland

We offer you

- Assistant work tasks in site- and quality management in industrial piping and equipment installation projects
- Work as part of an experienced site organization
- Project-specific employment contract
- Good orientation for your tasks
- Accommodation near the construction site as work sites are generally located throughout Finland

We expect

- Appropriate engineer-level training (BSc) in metal-, energy-, or oil industry
- Experience in working on industrial projects, industrial piping and equipment installations
- Fluent English language skills
- Fluent IT skills (MSoffice)
- Ability to read technical drawings and pipeline isometrics fluently
- Understanding and experience of industry quality requirements and standards
- Understanding and following occupational safety instructions
- If possible, own vehicle to commute between the construction site and the apartment (not a necessity)
